

## AIB Press Release New Hub Super User 17 Feb 2015

Like all service providers, from time to time AIB switches its suppliers in line with changing needs. This year, the focus is on the Hub. We are currently tendering for someone to host and maintain the Hub software, and we have recently awarded the tender to find a new Hub Super User and Technical Secretary to Working Group Systems. Hence we say a fond farewell to Siw Meckelborg (and her predecessors Anne Cath Petersen and Petter Sandvik) of EdiSys, Norway; and a big hello to Marika Timlin of Grexel, Finland. – Phil Moody

*"Things are going well if Super User is not needed"* - I know that from my background. I have been working with EECS registries in Grexel for the past 5 years in a wide variety of IT related tasks as software designer, database designer, tester, helpdesk, resource manager, etc. I wish that this experience proves valuable in solving Hub related problems between all of you. This is a great opportunity to obtain new tasks, get familiar with members around the AIB and to be connected more closely to Europe via the HUB and the WGS group from our - a bit remote - Helsinki. Hopefully, all of you members, registry keepers and WGS members will benefit from my work too.

Let's keep connected! - [Marika Timlin](#)

---

**The Association of Issuing Bodies** is the leading enabler of international energy certificate schemes. The AIB promotes the use of a standardised system, based on harmonised environment, structures and procedures in order to ensure the reliable operation of international energy certificate systems.

The AIB provides a well-tested standard for certificate trade - the **European Energy Certificate System (EECS)** - which is the basis for certificate schemes in 20 European countries and enables international trade. The knowledge of AIB is shared by available documents on Internet and by contacting the organisation.
