

Arnhem 29. 07. 2015 **Press release – for immediate release**

UNICORN SYSTEMS WILL RENEW THE ASSOCIATION OF ISSUING BODIES CENTRAL PROCESSING HUB

Unicorn System will renew the central registry HUB application for The Association of Issuing Bodies (AIB). AIB promotes the use of a standardised system, based on harmonised environment, structures and procedures, in order to ensure the reliable operation of international energy certificate systems. This standardised system is known as EECS® - the European Energy Certificate System. In doing so, it ensures reliable and efficient cross-border exchange of guarantees of origin (GOs), thereby strengthening and enlarging the market.

In order to further facilitate the international exchange of energy certificates, the AIB operates an inter-registry telecommunications Hub. Due to the enormous growth of the GOs traded, the current system is no longer sufficient. Unicorn Systems will completely redesign and rebuild the current application and make it future proof. The new solution will be hosted, operated and maintained in the Unicorn Energy Cloud.

Unicorn Systems will rebuild the HUB using its Unicorn Open Energy Platform, which has delivered several other European ICT Integration Solutions in the Energy Domain.

Jan Konrád, International Services Director Unicorn Systems, noted: *‘I am very happy with this new project, because again it is a project that contributes to an efficient, transparent European Energy Market’.*

Phil Moody, Secretary General of the Association of Issuing Bodies, added: *‘This represents a further improvement to our members and their account holders, in providing consumers with guaranteed information about the source of their energy’.*

About Unicorn Systems

Unicorn Systems is an innovative European company providing the largest information systems and solutions in the area of information and communication technologies. We have focused on providing high added value and a competitive edge to our clients for many years. We have been operating on the market since 1990 and since then we have created a series of high-end large-scale solutions that are extended and used among the most important companies in a variety of sectors. We have the best references from companies in energy and utilities, banking, insurance, communication and media, manufacturing, trade and the government. Our customers are not only the largest companies but also market leaders. We have detailed knowledge of the entire spectrum of all business sectors. We understand the principles of their operation as well as comprehend the specific needs of our customers.

Our extensive team of systematically educated experts perfectly masters all current product lines, components, technology, and therefore we have essentially no technological restrictions. Even though we enforce a lot of revolutionary ideas in our work, the overall delivery of proven solutions are subject to fundamental criteria - quality, scope, term and budget.

About The Association of Issuing Bodies

The AIB represents European certificate system administrators and is the leading enabler of international energy certificate schemes throughout Europe, and in particular those relating to guarantees of origin under Directives 2009/28/EC and 2012/28/EC. The AIB has developed, uses and promotes a standardised system: the European Energy Certificate System - EECS – which ensures the reliable operation of international certificate schemes. These schemes satisfy the criteria of objectivity, non-discrimination, transparency and cost effectiveness in order to facilitate the international exchange of certificates. In order to further facilitate the international exchange between energy certificates, the AIB operates an inter-registry telecommunications Hub. The AIB also provides a knowledge centre for energy certificate authorities across Europe, providing and sharing advice and guidance.
