

Greening the AIB - steps in 2018

The AIB commits to take responsibility for promoting sustainability within its own organisation

Electricity disclosure is highly relevant for electricity produced from renewable energy sources. Supporting an environmental friendly electricity market in Europe, AIB is part of the transition to a more sustainable world.

The AIB takes responsibility for its own organisation, and seeks to make its own structures and organisation environmentally and socially friendly. The main areas where AIB is able to improve its own sustainability are communication (website, emails) and the meetings which it holds across Europe.

Since 2012 AIB took several steps to improve its sustainable impact, and will take further responsibility of its operations by means of the following steps:

- ▶ Continuing to power its servers and computers using preferably renewable energy; and to benefit from the services of [Wattimpact](#).
 - ▶ Printing its Annual Reports on the most environmentally friendly paper (FSC paper, 100% recycled), in cooperation with the printing company [Lokay](#) that has committed itself to be a sustainable printer.)
 - ▶ Carbon offset all travelling by attendees to AIB meetings, including the four General Meetings per year, physical Working Group meetings, audits and reviews on site and the annual Strategy Meeting. For 2017, a total of 72 t CO₂e were compensated by [SouthPole](#).
 - ▶ Holding its quarterly General Meetings:
Seek venues (hotels) with environmental management certification, and preferably those which engage in other activities relating to improving energy efficiency, reducing environmental impact and supporting social responsibility. One part to realize this is to prefer regional food with a good amount of vegetarian options.
-

CERTIFICATE OF CLIMATE PROTECTION

This certificate verifies that

Association of Issuing Bodies (AIB)

has compensated for the emissions generated from business travels in 2017.

The AIB has offset 72.00 tonnes of CO₂e

by investing in South Pole's climate protection project:

Dak Pone Hydro, Vietnam (300653)

Thank you for committing to bold climate action. Your contribution is not only a meaningful step towards mitigating climate change globally, but also changes lives for the better by contributing to the Sustainable Development Goals set out by the UN.

Renat Heuberger
CEO, South Pole

Certificate no. 102566_7240

This certificate is issued by South Pole. For more information about our services and more than 500 climate protection projects, please visit: southpole.com/projects. The CO₂ emissions indicated on the certificate are compensated through investments in the above mentioned carbon offset projects based on international standards.
