

## **EECS Rules Fact Sheet 23 CONVERSION TRACKING**

---

Document Reference	AIB-EECS-FS23
Version number	1
Issue	Release 1.00
Date of Issue	19 May 2022
Reason for Issue	Initial release
Approved by	EECS Unit

## EECS RULES FACT SHEET 23 CONVERSION TRACKING

---

### Conversion Tag

The table below lists the parameter values for the data on the EECS Certificate that informs about whether or not the certificate was issued following EECS Certificate Conversion, as in Section C3.5.4(u) of the EECS Rules.

	<b>Conversion Tag number</b>	<b>Conversion Tag meaning</b>
C	01	<b>No conversion:</b> Energy Carrier produced directly from primary energy source or conversion from other Energy Carrier(s) produced on the site of the conversion device for which no Certificates were issued
C	02	<b>Tracked conversion:</b> Conversion from other Energy Carrier(s) for which Certificates were cancelled as proof of the Attributes of the represented energy

Where the Conversion Tag has the value C02, EECS certificates may contain information on pre-conversion support. The values for the pre-conversion support info are the same as those mentioned in EECS Fact Sheet 3.

### Storage Tag

The table below lists the parameter values for the data on the EECS Certificate that informs about whether or not the certificate was issued for energy released from storage, as in Section C3.5.4(v) of the EECS Rules.

	Storage Tag level 1	Storage Tag meaning	Storage Tag level 2	Meaning
S	01	<b>No storage outside the boundaries of the Production Device:</b> Issued for energy Output from a Production Device. The energy output has not passed through storage OR no EECS Certificates were issued for this energy prior to being stored. This refers to issuance of Certificates under EECS Rules sections C3.2.4(a)(i) and to issuance of Certificates for energy that has never passed through storage.	00	Unspecified
			01	Energy not released from storage
			02	Energy released from Onsite storage
	02	<b>Storage issuance:</b> Issued for energy released from storage while EECS Certificates are cancelled for proving the Attributes of the energy fed into the Storage System. This refers to issuance of Certificates under EECS Rules sections C3.2.4(a)(ii).	00	Unspecified

**Note:** Storage Tag value S02XX is only allowed for electricity certificates with (sub)hourly production periods or for gas certificates. (Following EECS Rules section N6.4.5)
