

Country: Brussels-Capital Region, Belgium		Author: Laura Rebreau		
		Actual implementation in the MS	Comments	Instructions for assessment/explanations
Date: 2023/09/08)				
GENERAL				
	Disclosure system implemented	YES		NO : No legislation and no system in place Almost in line: have a legislation in place but does not consider all elements required by the directive e.g. no environmental legislation YES : legislation in place + all elements disclosed
	- Legislation	<p><b>Ordinance of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region</b> ("electricity ordinance") Internet reference in French and Dutch: <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2001/07/19/2001031386/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2001/07/19/2001031386/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2001/07/19/2001031386/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2001/07/19/2001031386/justel</a></p> <p><b>Ordinance of 1 April 2004 on the organisation of the gas market in the Brussels-Capital Region, the road charges for gas and electricity and amending the order of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region</b> ("gas ordinance") <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2004/04/01/2004031172/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2004/04/01/2004031172/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2004/04/01/2004031172/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2004/04/01/2004031172/justel</a></p> <p><b>Ordinance of 6 May 2021 on the organisation of thermal energy networks and the accounting of thermal energy in the Brussels-Capital Region</b> ("thermal energy ordinance") <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2021/05/06/2021031475/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2021/05/06/2021031475/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2021/05/06/2021031475/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2021/05/06/2021031475/justel</a></p> <p><b>Decree of 17 December 2015 of the Government of the Brussels-Capital Region on the promotion of green electricity and energy from renewable sources</b> <a href="https://www.ejustice.just.fgov.be/eli/arrete/2015/12/17/2015031887/justel">https://www.ejustice.just.fgov.be/eli/arrete/2015/12/17/2015031887/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/besluit/2015/12/17/2015031887/justel">https://www.ejustice.just.fgov.be/eli/besluit/2015/12/17/2015031887/justel</a></p>	<p>The electricity ordinance establishes the criteria for electricity GOs and identifies BRUGEL as the authorised body to issue and manage GOs (article 27).</p> <p>The gas ordinance establishes the criteria for gas GOs and identifies BRUGEL as the authorised body to issue and manage GOs (article 22ter).</p> <p>The thermal energy ordinance establishes the criteria for thermal energy GOs (article 14).</p> <p>The Decree organises the issuing and management of GOs for electricity, gas and thermal energy by BRUGEL (articles 11quater to 16). Article 16bis of the Decree describes the disclosure procedure and the suppliers' obligations.</p>	Please name the relevant regulations and provide an internet reference (preferably a version in English)
	- When did the regulation(s) regarding disclosure come into force?	January 2016.		Please name the date in which the regulation(s) came into force.
	- Competent Body (who is and since when?)	BRUGEL is the competent body for electricity GOs since 2007. It has been appointed by the Ordinance of 14 December 2006, amending the Ordinance of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region. BRUGEL is the competent body for gas GOs since 2022. It has been appointed by the Ordinance of 17 March 2022 modifying the Ordinance of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region and the Ordinance of 1 April 2004 on the organisation of the gas market in the Brussels-Capital Region.		Please specify and provide reference to legal nomination and the date since when the body was appointed
	RE-GO system implemented	Yes		NO : no secondary legislation and no system in place Almost inline : secondary legislation in place but no registry YES : Secondary legislation in place + registry

	- Legislation	<p><b>Ordinance of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region</b> ("electricity ordinance") Internet reference in French and Dutch: <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2001/07/19/2001031386/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2001/07/19/2001031386/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2001/07/19/2001031386/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2001/07/19/2001031386/justel</a></p> <p><b>Ordinance of 1 April 2004 on the organisation of the gas market in the Brussels-Capital Region, the road charges for gas and electricity and amending the order of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region</b> ("gas ordinance") <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2004/04/01/2004031172/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2004/04/01/2004031172/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2004/04/01/2004031172/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2004/04/01/2004031172/justel</a></p> <p><b>Ordinance of 6 May 2021 on the organisation of thermal energy networks and the accounting of thermal energy in the Brussels-Capital Region</b> ("thermal energy ordinance") <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2021/05/06/2021031475/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2021/05/06/2021031475/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2021/05/06/2021031475/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2021/05/06/2021031475/justel</a></p> <p><b>Decree of 17 December 2015 of the Government of the Brussels-Capital Region on the promotion of green electricity and energy from renewable sources</b> <a href="https://www.ejustice.just.fgov.be/eli/arrete/2015/12/17/2015031887/justel">https://www.ejustice.just.fgov.be/eli/arrete/2015/12/17/2015031887/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/besluit/2015/12/17/2015031887/justel">https://www.ejustice.just.fgov.be/eli/besluit/2015/12/17/2015031887/justel</a></p>	<p>Both the electricity and gas ordinances were amended several times to take into account the evolution of European and federal legislation. The various modifications re-define and complete the dispositions regarding RES and HEC electricity GOs and RES gas GOs, as well as disclosure for all green energy. The thermal energy ordinance implements a GO system for heating and cooling from RES, completing the transposal of the renewable energy directive 2018/2001/EU.</p> <p>The Decree further details the implementation of the GO system for renewable energy (RES and HEC electricity, RES gas, RES heating and cooling).</p>	Please name the relevant regulations and provide and internet reference
	- Competent Body (who is and since when?)	BRUGEL is the competent body since 2007. It has been appointed by the Ordinance of December 14, 2006, modifying Ordinance of July 19, 2001 on the organisation of the electricity market in the Brussels-Capital Region.		Please specify and provide reference to legal nomination and the date since when the body was appointed
	- Is the appointed Competent Body the only competent body in your domain for Gos (Who and When)?	Yes		Please specify
	CHP-GO system implemented	Yes	BRUGEL is currently implementing the IT tools necessary to start issuing GOs for HEC and plans to start issuing beginning of 2024. The calculations are based on the AIB cogeneration model.	NO : no secondary legislation and no system in place Almost inline : secondary legislation in place but no registry YES : Secondary legislation in place + registry
	- Legislation	<p><b>Ordinance of 19 July 2001 on the organisation of the electricity market in the Brussels-Capital Region</b> ("electricity ordinance") Internet reference in French and Dutch: <a href="https://www.ejustice.just.fgov.be/eli/ordonnance/2001/07/19/2001031386/justel">https://www.ejustice.just.fgov.be/eli/ordonnance/2001/07/19/2001031386/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/ordonnantie/2001/07/19/2001031386/justel">https://www.ejustice.just.fgov.be/eli/ordonnantie/2001/07/19/2001031386/justel</a></p> <p><b>Decree of 17 December 2015 of the Government of the Brussels-Capital Region on the promotion of green electricity and energy from renewable sources</b> <a href="https://www.ejustice.just.fgov.be/eli/arrete/2015/12/17/2015031887/justel">https://www.ejustice.just.fgov.be/eli/arrete/2015/12/17/2015031887/justel</a> <a href="https://www.ejustice.just.fgov.be/eli/besluit/2015/12/17/2015031887/justel">https://www.ejustice.just.fgov.be/eli/besluit/2015/12/17/2015031887/justel</a></p>		Please name the relevant regulations and provide and internet reference
	- Competent Body (who is and since when?)	BRUGEL is the competent body since 2007. It has been appointed by the Ordinance of December 14, 2006, modifying Ordinance of July 19, 2001 on the organisation of the electricity market in the Brussels-Capital Region.		Please specify and provide reference to legal nomination and the date since when the body was appointed

	- Is the appointed Competent Body the only competent body in your domain for Gos (Who and When)?	Yes		Please specify and provide reference to legal nomination and the date since when the body was appointed
<b>ID</b>	<b>Implementation of the elements of the Directive Related to GOs</b>			
<b>Definition</b>				
	The sole function of a GO is the usage for disclosure purposes for final customers.	Yes		YES: in the Domain GO is defined as such (electronic energy certificate that meets the requirement of the RES Directive for RE-GO) NO: in the Domain GO is not defined as such NA: No RE-GO system in place
<b>Implementation of the relevant Articles of the Directive referring to Gos</b>				
	Have you fully implemented the requirements of Art. 15 of the RES-Directive?	Yes		
	If not, please specify the ones which you have not implemented yet.	NA		
<b>ID</b>	<b>RE-DISS BPR</b>			
<b>12th Month Rule</b>				
	Metered production periods for issuing GOs are not longer than a calendar month.	Yes	Issuing is done every 3, 6 or 12 months depending on the size of the plant (most production units are relatively small); quarterly issuing is only done for the municipal waste incineration plant.	NO : metered periods for issuing GOs are longer than a calendar year YES : If true Nota Bene : in case only RES GOs implemented only assess RES-GO system
	Metered production periods for issuing GOs do not run across the start and end of disclosure periods. Longer intervals up to one year are acceptable for very small plants, for example.	Yes	Currently, the disclosure is done quarterly but starting 2024 it will be done monthly. The metered production periods will therefore overlap with the disclosure periods.	NO : Metered periods for issuing GO run across the start and end of disclosure periods. YES : If true Nota Bene : in case only RES GOs implemented only assess RES-GO system
	If possible, issuing of GOs is done DIRECTLY after the end of each production period (potential exemption PV)	Almost in line	Issuing is done every 3, 6 or 12 months depending on the size of the plant.	NO : more than 6 months after the end of the production period Almost in line : between 3 and 6 months after the PP YES : within 3 months after the production period
	Lifetime of GO is limited to 12 months after the end of the production period.	Yes	Decree of 17 December 17 2015 of the Government of the Brussels-Capital Region on the promotion of green electricity	NO : is not true YES : is true Nota Bene: in case only RES GOs implemented only assess RES-GO system <i>In the description section, please identify if this is true for other GO systems in place as well</i>
	GOs that have reached this lifetime (and haven't been used for disclosure) are collected into the Residual Mix	NA	We don't calculate yet the RM for the Region.	NO : is not true YES : is true Nota Bene: in case only RES GOs implemented only assess RES-GO system <i>In the description section, please identify if this is true for other GO systems in place as well</i>
	Cancellations of GO relating to production periods in a given year X which take place until a given deadline in year X+1 count for disclosure in year X. Later cancellations count for disclosure in year X+1. (In case that disclosure periods differ from the calendar year, the deadline is defined accordingly.)	Yes		Answer is YES or NO Nota Bene : in case only RES GO is implemented only assess RES-GO system <i>Please provide details of the system in place in the Domain.</i>
	Deadline is set on 31 March X+1	Legally, yes.	In practice, the deadline is end of April X+1.	YES: Deadline is the stated one NO: Different Deadline <i>If other, Please state the deadline in the description column.</i>
	The same allocation rule applies for expired GO: The date of expiry thus determines the disclosure period for which information from expired GO will be used.	NA		Answer is YES or NO" Nota Bene : in case only RES GOs implemented only assess RES-GO system
<b>Usage of EECS</b>				

	The implementation of GO in all countries in Europe is based on the European Energy Certificate System (EECS) operated by the Association of Issuing Bodies (AIB). In case that national GO systems are established outside the EECS, then EECS is at least used for transfers between registries.	Yes		NO : transfers of GOs between registries are not done through EECS YES : transfers of GOs between registries are done through EECS
	Is the GO system in the country established exclusively according to EECS?	Yes	Decree of 17 December 2015 of the Government of the Brussels-Capital Region relating to the promotion of green electricity	YES: If true Almost in Line: both national GO and EECS system NO: if not true
	Does the domain utilise the AIB Hub for international transfers?	Yes		Yes: If true Almost in Line: also use other systems for transfer of GO besides the AIB Hub No: if not true
	In case that not all European countries are members of EECS, appropriate connections between the EECS system and non-EECS members as well as between different non-EECS members are to be established. These include inter alia procedures for assessing the reliability and accuracy of the GO issued in a certain country and interfaces for the electronic transfer of GO.	Yes	We use the same criteria for all GO, as mandated by the decree of 17 December 2015.	NO : no procedure to assess reliability and accuracy of GO YES : procedures in place to assess reliability and accuracy of GO
	Ex-domain cancellations of GO, where a GO is cancelled in one registry and a proof of cancellation is then transferred to another country in order to be used there for disclosure purposes, are only used if there is no possibility for a secure electronic transfer and if there is an agreement on such ex-domain cancellations between the competent bodies involved. Statistical information on all ex-domain cancellations are to be made available in order to support Residual Mix calculations.	Yes		NO : none of the two statements are true Almost in line : one of the statements is true YES : Both statements are true Nota Bene : in case only RES GOs implemented only assess RES-GO system
<b>Issuing of GOs for different energy sources and generation technologies</b>				
	GOs are issued only for the net generation of a power plant, i.e. gross generation minus the consumption of all auxiliaries related to the process of power production. For hydro power plants involving pumped storage this means that GOs are issued only for the net generation which can be attributed to natural inflow into the reservoir.	Yes		NO : If not true YES : If true
	Verification mechanisms are implemented for ongoing control of registered data (e.g. reaudits, random checks, etc.).	Yes		NO : If not true YES : If true
	Correct accounting of RES share of combustion plants is assured by adequate measures (EECS Rules)	Yes		NO : If not true YES : If true
	The competent body can correct errors in GOs it has issued before they are exported, and is the only one with this competence.	Yes		NO : If not true YES : If true
	The GO system is extended beyond RES & cogeneration to all types of electricity generation.	No	GO in Brussels are issued only for electricity produced from RES at the moment. Issuance for HEC electricity is planned for end of 2023 / beginning of 2024.	NO : no extension YES : extension in place
	GOs are issued for all electricity production, unless an RTS applies for that production, e.g. for the disclosure of supported electricity	GOs are issued for supported and non supported electricity. Gas GOs are not being issued at the moment (no plants yet in Brussels).		NO : If not true YES : If true

	The Competent body has made the use of GOs mandatory for all electricity supplied to final consumers (full disclosure implemented).	No		NO : If not true YES : If true
	All types of GO are handled in one comprehensive registry system per country. (For an exception see the coexistence of national GO systems and EECS )	Yes		Almost in line: if more than one registry, but closely coordinated YES: one comprehensive registry NO: Different registries
	Technical changes to plants are registered as soon as is reasonably practicable.	Yes		NO : If not true YES : If true
	GOs have no function in terms of target compliance and should not be used as support instrument. All GOs are linked to disclosure.	Yes	In the absence of a formal request for EECS Gos, non transferable GOs are automatically issued for all RES electricity production and cancelled immediately.	YES : all GOs are linked to disclosure Almost in line : if at least RES GO system is linked with disclosure, but others not clearly NO : no GO system is linked to disclosure
	A GO is considered as being used only once it has been electronically cancelled.	Yes		NO : If not true YES : If true
	After cancellation, no further cancellation, transfer or export of the given GO is possible	Yes		NO : If not true YES : If true
	After expiry, no further cancellation, transfer or export of the given GO is possible	Yes		NO : If not true YES : If true
	An exported GO is marked as removed from the exporting registry	Yes		NO : If not true YES : If true
	Processes in the registry excludes duplication of GOs.	Yes		NO : If not true YES : If true
	Registries are audited on a regular basis.	Yes		NO : If not true YES : If true
	If multiple certificates are to be issued, e.g. a GO for disclosure and a support certificate for management of a support system, then these are legally separated.	Yes		NO : not legally separated YES : legally separated NA: no multiple certificates
	This GO combines the functionalities of a RES-GO and a high efficiency cogeneration GO.	Yes		NO : the GO does not combine both informations (lost of one information). YES : the GO combines both RES and CHP in one GO
	<i>GO as the unique "tracking certificate"</i>			
	GO is the only "tracking certificate" used. Any other tracking systems of a similar purpose and function as GO are closely coordinated with GO and eventually converted to GO.	Yes		YES : GO is the only tracking certificate Almost in line : coordination between GO and other certificate NO : no coordination between the 2 systems
	Besides GO, only Reliable Tracking Systems (which may include contract based tracking) and the Residual Mix is available for usage for disclosure. No other tracking mechanisms are accepted.	Yes		YES : GO + RM or GO + RM + RTS NO : GO + other tracking system which is not a RTS + (RM)
	Green power quality labels use GO as the unique tracking mechanism.	NA	There is no green power label recognised in the Brussels Region at the moment.	either YES or NO or NA if no green power label
	<i>Recognition of GO imported from other countries</i>			

	<p>European countries choose one of the two following options and apply it consistently for all foreign GO :</p> <ul style="list-style-type: none"> <li>- Rejection of GOs only relates to the cancellation of GOs and subsequent use for disclosure purposes in the respective country and does not restrict the transfers of GOs between the registry of the considered country and the registries of their countries. This means that the decision about the recognition of a GO does not hinder its import into the considered country.</li> <li>- Rejection of GOs implies blocking their import to the national registry.</li> </ul>	<p>Yes (option 2)</p>	<p>Currently, there is no connection between the Brussels registry and countries other than those connected to the AIB HUB. We also reject all non RES GO, such as nuclear GO or fossil GO.</p>	<p>YES : If one of the options is applied  NO : If none of the options is applied  NA : no rejection of GO foreseen in the legislation</p>
	<p>The choice of one or the other option is transparent for all market parties and clearly communicated.</p>	<p>Yes</p>		<p>YES : If true  NO : If not true  NA : no rejection of GO foreseen in the legislation</p>
	<p>Within the rules set by the respective Directives, European countries consider their criteria for the acceptance of imported GOs for purposes of disclosure.</p>	<p>No</p>	<p>Current legislation does not formally provide rejection criteria. The decision belongs to BRUGEL, based on the recognition criteria defined by the current legislation. Currently imports/exports are allowed only through the AIB Hub , which ensures EECS quality. The only exception to this rule are GOs with a validity greater than 12 months after the production end date; such GOs are not accepted for import in the Brussels registry.</p>	<p>NO : no rejection criteria  YES : Rejection criteria have been listed  Almost in line : Rejection criteria being discussed</p>
	<p>These criteria address imports at least from all EU member states, other members of the European Economic Area (EEA) and Switzerland. The parties to the Energy Community Treaty are considered as well, as soon as GO imports from these countries become relevant.</p>	<p>No</p>	<p>Current legislation does not formally provide rejection criteria. The decision belongs to BRUGEL, based on the recognition criteria defined by the current legislation. Currently imports/exports are allowed only through the AIB Hub , which ensures EECS quality. The only exception to this rule are GOs with a validity greater than 12 months after the production end date; such GOs are not accepted for import in the Brussels registry.</p>	<p>NO :criteria do not address imports of GO  YES :criteria address imports of GO</p>
	<p>The criteria specify the electronic interfaces, data format and contents of GOs to be imported, which the respective country accepts for imports of GOs (such as the EECS Hub).</p>	<p>No</p>	<p>Current legislation does not formally provide rejection criteria. The decision belongs to BRUGEL, based on the recognition criteria defined by the current legislation. Currently imports/exports are allowed only through the AIB Hub , which ensures EECS quality. The only exception to this rule are GOs with a validity greater than 12 months after the production end date; such GOs are not accepted for import in the Brussels registry.</p>	<p>NO : criteria do not specify electronic interface, data format and contents of GO to be imported  YES : criteria do specify electronic interface, data format and contents of GO to be imported</p>
	<p>Conditions for the recognition of GOs from other countries are that they were issued based on the relevant articles on GOs in the European Directives and national legislation.</p>	<p>Yes</p>		<p>NO : If not true  YES : If true</p>
	<p>The recognition of GOs from other countries is rejected if these countries have not implemented an electricity disclosure system.</p>	<p>Yes</p>	<p>Currently imports/exports are allowed only through the AIB Hub , which ensures EECS quality.</p>	<p>NO : If not true  YES : If true</p>

	<p>The recognition of GOs from other countries is rejected if the country which has issued the GOs or the country which is exporting the GOs have not implemented appropriate measures which effectively avoid double counting of the attributes represented by the GOs. Such appropriate measures ensure the exclusivity of the GOs for representing the attributes of the underlying electricity generation, implement clear rules for disclosure, establish a proper Residual Mix or equivalent measures, and ensure their actual use.</p> <p>Furthermore, the appropriate measures ensure that attributes of exported GOs are subtracted from the Residual Mix of the exporting country and cannot be used for disclosure at any time in the issuing or the exporting country by explicit mechanisms, unless the GOs are re-imported and cancelled there.</p>	yes	Currently imports/exports are allowed only through the AIB Hub , which ensures EECS quality.	<p>NO : If not true          YES : If true          Almost in line: if part of the measures are implemented</p>
<b>Disclosure Schemes and other Reliable Tracking Systems</b>				
	Full disclosure schemes are implemented, including the disclosure of CO <sub>2</sub> emissions and radioactive waste.	No	The only legal obligation at regional level is disclosure of the green share of the electricity supplied.	<p>YES or NO or Almost in line if only CO<sub>2</sub> or Nuclear waste or other restriction (e.g. only provided on website and not with bills and information material)  <i>In the description column please specify:</i>          - If the answer is almost in line, please describe the attribute that is missing (or any other restriction).          - Please insert the energy sources (fuels) that have to the distinguished.          - Also specify if certain attributes are allocated as "unknown" share in the fuel mix?</p>
	<p>RTS (Reliable Tracking Systems) can comprise, where applicable:</p> <ul style="list-style-type: none"> <li>- Homogeneous disclosure mixes for regulated market segments where no choice of supplier or different products exists,</li> <li>- Support systems whose interaction with disclosure requires a certain allocation of the attributes of supported generation (e.g. a pro-rata allocation to all consumers in a country where RES electricity is supported by a feed-in tariff),</li> <li>- Contract based tracking</li> </ul>	No		<p>NA          YES : if true          Almost in line          NO is not allowed</p>
<b>Calculations of Residual Mixes</b>				
	Where a full-disclosure system has not been implemented in the country, the countries provide a Residual Mix (RM) as a default set of data for disclosure of energy volumes for which no attributes are available based on cancelled GO or based on other Reliable Tracking Systems. The use of uncorrected generation statistics (e.g. on national or UCTE, Nordel etc. levels) are avoided.	No		<p>YES : proper RM calculation, or fully explicit tracking system applied based on GO and RTS          Almost in line : default set of data avoiding double counting of RES attributes; or fully explicit tracking system applies, but not fully based on GO and RTS          NO : No RM</p>
	The calculation of the Residual Mix follows the methodology developed in the RE-DISS project and taken over by the AIB.	No	BRUGEL is only verifying the green share in the disclosure statements from the suppliers.	<p>YES : use of RE-DISS European Residual mix or of RE-DISS national RM          NO : no use of RE-DISS mixes</p>
	The Competent body from my country cooperates with AIB in order to adjust the Residual Mix in reflection of cross-border transfers of physical energy, GO and RTS.	No	Brugel provides data to AIB to support residual mix calculation in other countries and the calculation of the European Attribute Mix	<p>YES : if true (including e.g. Data collection of RE-DISS)          NO : if not true</p>

	For purposes of this cross-border adjustment, the competent body uses data provided by RE-DISS. The competent body also supports the collection of input data for the related calculations by the AIB (and its consultant).	No	Brugel provides data to AIB to support residual mix calculation in other countries and the calculation of the European Attribute Mix	The focus is on the first part of the sentence YES : use of AIB RM data (RE-DISS methodology) Almost in line: use of EAM data (in case of deficit domains) NO : no use of AIB data NA : fully explicit disclosure system (without unknown shares)
	As a default, the Residual Mix is calculated on a national level. However, in case that electricity markets of several countries are closely integrated (e.g. in the Nordic region), a regional approach to the Residual Mix may be taken. This should only be done after an agreement has been concluded amongst all countries in this region which ensures a coordinated usage of the regional Residual Mix.	NA	In Belgium, the residual mix is calculated on a regional level. However, the 3 Regions work informally together to offer an integrated approach for Belgium.	YES : coordinated regional approach or national approach NO : uncoordinated regional approach or no RM NA
<b>Contract based tracking</b>				
	If contract based tracking (CBT) is allowed in a country, it is regulated clearly and declared in the domain protocol.	NA		YES : true or CBT accepted NO : not true Almost in line : CBT exists and efforts have been made to regulate it NA : CBT not allowed
	Such regulations ensure that - The rules of the tracking system are transparent and comprehensive and are clearly understood by all participants in the system. - Double counting of attributes and loss of disclosure information is minimised within the contract based tracking scheme and also in the interaction of the contract based tracking scheme to GO and other RTS (if applicable). As a precondition for this, the contract based tracking scheme is able to provide comprehensive statistics about the volumes and types of electricity attributes which are tracked through it. - The relevant information for disclosure purposes is available in time to meet the timing requirements	NA		YES : true NO : not true Almost in line : CBT exists and efforts have been made to regulate it NA : when CBT is not allowed
<b>Timing of Disclosure</b>				
	Electricity disclosure is based on calendar years.	Yes		YES or NO Almost in line: if calendar year + another period can be chosen (ex. Financial year) <i>In the description column, if other period is used, please identify it: starting date-end date</i>
	The deadline for cancelling GO for purposes of disclosure in a given year X is 31 March of year X+1.	Yes	In practice, the deadline is by end of April X+1.	Yes: Deadline is the stated one No: Different Deadline <i>If other, Please state the deadline in the description column.</i>
<b>Further Recommendations on Disclosure</b>				
	The relation between support schemes for RES & cogeneration on the one side and GO and disclosure schemes on the other side are clarified. Where necessary, the support schemes should be defined as RTS	Yes		YES : clear allocation of supported attributes NO : no clear allocation of supported attributes Almost in line : not allowed NA : No legislation <i>In the description column please describe how supported energy is allocated to consumers in terms of disclosure.</i>

	If support schemes are using transferable certificates, then these certificates are separated from GO	Yes		NO : not legally separated YES : legally separated NA: no multiple certificates
	All electricity products offered by suppliers with claims regarding the origin of the energy (e.g. green or low-carbon power) are based exclusively on cancelled GO. No other tracking systems are allowed, with the exception of mechanisms defined by law, e.g. a pro-rata allocation of generation attributes to all consumers which is related to a support scheme.	Yes		YES : only GOs accepted for green products NO : other TS accepted for green products NA : no green products on the market Almost in line : not allowed
	As required by Art. 3 (9) of the IEM Directive 2009/72/EC annual disclosure of the supplier mix on or with the bill is mandatory. This also includes information on environmental impacts.	Almost in line.	Federal legislation requires that suppliers disclose the mix on the bill. However, there is no regional legislation regarding total fuel mix disclosure.	NO : annual disclosure of supplier mix is not mandatory on or with the energy bill and it does not include information on environmental parameters. YES : annual disclosure of supplier mix is mandatory on or with the energy bill and it does include information on environmental parameters Almost in line: annual disclosure of supplier mix is mandatory on or with the energy bill but it does not include information on environmental parameters NA : no disclosure system in place
	Suppliers offering two or more products which are differentiated regarding the origin of the energy are required to give product-related disclosure information to all their customers, including those which are buying the “default” remaining product of the supplier.	Yes	Suppliers can offer green products to their customers and, in doing so, are obliged to cancel GOs. Suppliers are obliged by the federal legislation to disclose to all their customers the supplier residual mix, but not the product mix.	YES or NO NA : no green products on the market Almost in line : only product mix is disclosed, but not the (mandatory) supplier mix
	There are clear rules for the claims which suppliers of e.g. green power can make towards their consumers. There are rules on how the “additionality” of such products can be measured (the effect which the product has on actually reducing the environmental impact of power generation), and suppliers are required to provide to consumers the rating of each product based on these rules.	No	Suppliers can offer green products to their customers and, in doing so, are obliged to cancel GOs. BRUGEL verifies that they respect their obligations towards their consumers.	YES : clear rules on green products NO : no clear rules NA : no green products on the market Almost in line : not allowed
	Claims made by suppliers and consumers of green or other low-carbon energy relating to carbon emissions or carbon reductions are regulated clearly. These regulations avoid double counting of low-carbon energy in such claims. A decision is taken whether such claims should adequately reflect whether the energy purchased was “additional” or not.	No	Suppliers can offer green products to their customers and, in doing so, are obliged to cancel GOs. BRUGEL verifies that they respect their obligations towards their consumers.	YES : clear rules on green products NO : no clear rules NA : no green products on the market Almost in line : not allowed
	In case that suppliers are serving final consumers in several countries rules are developed and implemented consistently in the countries involved on whether the company disclosure mix of these suppliers relates to all consumers or only to those in a single country.	NA		For most countries Not Known (NK) applies if information cannot be found YES : clear rules on level of disclosure NO : known practices of international disclosure by suppliers Almost in line : some progress has been made NA : not allowed
	The following recommendations are followed with respect to the relation of disclosure to cooperation mechanisms (Art 6 - 11 of Directive 2009/28/EC):			
	a) If EU MS or MS or any other country agree on Joint Projects, such agreements also clarify the allocation of attributes (via GO, RTS or Residual Mix) issued from the respective power plants	NA		YES: If agreements for Joint Projects clarify the allocation of attributes NO: If the proposal is not true NA: No joint projects

b) If EU MS agree on Joint Support Schemes, such agreements clarify the allocation of attributes (via GO, RTS or Residual Mix) issued from the power plants supported under these schemes	NA		YES: If agreements for Joint Support Schemes clarify the allocation of attributes NO: If the proposal is not true NA: No joint projects
---	----	--	---

### Information on the Recognition of GO

Extra questions on recognition of GO			Instructions for assessment/explanations
Does the Domain treat imported GO as national GO when it comes to disclosure? If so, please specify.	Yes		NO: It treats imported GO differently from national issued GO in disclosure (for example: has criteria for accepting imported GO). YES: treats them equally "Almost in line" is not possible
Does the Domain have criteria in place for accepting foreign GO for disclosure?	Yes	Article 16 of the decree of 17 December 2015, and subsequent decision on the recognition of GOs, Decision 20230214-223. Internet reference in French and Dutch: <a href="https://www.brugel.brussels/publication/document/decisions/2023/fr/Decision%20223-procedure-reconnaissance-GO.pdf">https://www.brugel.brussels/publication/document/decisions/2023/fr/Decision%20223-procedure-reconnaissance-GO.pdf</a> (FR) <a href="https://www.brugel.brussels/publication/document/beslissingen/2023/nl/Beslissing-223-procedure-erkenning-garanties-oorsprong.pdf">https://www.brugel.brussels/publication/document/beslissingen/2023/nl/Beslissing-223-procedure-erkenning-garanties-oorsprong.pdf</a> (NL)	YES : criteria in place NO : no criteria in place "Almost in line" is not possible NA : no rejection of GO foreseen in the legislation
- If yes, please specify the criteria which are in place	GOs have to respect all RED II criteria, as transposed by the Electricity and Gas ordinances. Therefore, only EECS GOs transferred via the AIB Hub and with a validity period of maximum 12 months after the production end date are recognised in the Brussels domain.		Please state which criteria of Art. 15 (6) RES Directive are implemented: Electronic database in place One competent body appointed by law all GOs linked to disclosure CO <sub>2</sub> emissions and radioactive waste included in disclosure display transparent publication of disclosure information others, please specify
Since when do you have these criteria in place?	Electricity: 2015 Gas: 2022		Please specify
Are the criteria transparently published in your country?	Yes	Internet reference in French and Dutch: <a href="https://www.brugel.brussels/publication/document/decisions/2023/fr/Decision%20223-procedure-reconnaissance-GO.pdf">https://www.brugel.brussels/publication/document/decisions/2023/fr/Decision%20223-procedure-reconnaissance-GO.pdf</a> (FR) <a href="https://www.brugel.brussels/publication/document/beslissingen/2023/nl/Beslissing-223-procedure-erkenning-garanties-oorsprong.pdf">https://www.brugel.brussels/publication/document/beslissingen/2023/nl/Beslissing-223-procedure-erkenning-garanties-oorsprong.pdf</a> (NL)	Please specify and indicate where those are published. If electronically please provide a link.

### Information on Environmental Parameters

What are the data basis for disclosing CO <sub>2</sub> emissions and radioactive waste when using GOs or other Reliable Tracking Systems for disclosing specific supplier mixes?	NA		Please describe how it is done in the Domain
--	----	--	--

### Information on Disclosure aspects

Extra questions regarding the provision of disclosure information on a disclosure statement towards end consumers			Instructions for assessment/explanations
Are there any regulations on graphical display of disclosure information by suppliers (requirements on how to display, fixed format of disclosure statement, ...)	No		Pls. Provide short explanation plus reference to website/regulation.

Is there a requirement to provide comparison values besides supplier- and product mix? If so, which one (e.g. national production mix)	No		<i>Pls. Provide short explanation plus reference to website/regulation.</i>
Is disclosure information somehow controlled by an official or independent institution? By whom? If so, is it audited or approved or calculated by that body?	No		<i>Pls. Provide short explanation plus reference to website/regulation.</i>
Is disclosure information of different suppliers centrally available (e.g. at the Competent Body, on a central website)?	No		<i>Pls. Provide short explanation plus reference to website/regulation.</i>
Is there an official regulation on communication of aspects related to additionality or ecological quality aspects together with disclosure? Please describe.	No		<i>Pls. Provide short explanation plus reference to website/regulation.</i>
Is there a specific regulation on disclosure of (high-efficient) CHP in your domain?	No		<i>Pls. Provide short explanation plus reference to website/regulation.</i>
