## Datasheet GO and Disclosure

This datasheet consists of a list of questions, aimed at Disclosure Competent Bodies (DCB), but with relevance for Issuing Bodies (if they are not also the DCB) and stakeholders for Guarantees of Origin in General.

Updating this datasheet is part of the periodic review procedure of AIB, whereby the Issuing Body is asked to provide - or to ask the DCB to provide - a filled in Datasheet. All filled in Datasheets are collected and published on the AIB Website.

Note that, although providing an updated datasheet is a mandatory part of the review process, the contents of the datasheet are not scrutinized for incompliances. The value of the Datasheet is purely informative, to quickly gain an understanding of disclosure rules and procedures in that in that sense, answering all questions is not mandatory. It does provide most value for the involved parties and Issuing Bodies and DCBs in other domains, to maximally fill in the questionnaire. In order to help prioritizing the most important questions, the questionnaire is split into two sections. Section A can be considered to contain questions with the highest priority; the answers to these questions are undoubtedly valuable for all parties involved. Section B contains further important questions, but which can be considered more advanced, such that not all Issuing Bodies and/or DCBs have already considered the implementation of

If you have suggestions on improving the residual mix calculation method and/or this template, please inform us at info@aib-net.org.

If you have best practices to share regarding disclosure, welcome to inform on the same
