

Country: LITHUANIA			
	Comments	Instructions for assessment/explanations	
Date: 2017/08/27			
GENERAL			
	Disclosure system implemented	YES	NO : No legislation and no system in place Almost in line: have a legislation in place but does not consider all elements required by the directive e.g. no environmental legislation YES : legislation in place + all elements disclosed
	- Legislation	2009/28/EC Directive and local legislation: 1.The rules/regulation of GO procedures approved by Order No.1-298 (adopted by the Minister of Energy of the Republic of Lithuania dated on 14 November 2016). These rules explain how the GO procedure operates in Lithuania. https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8 ; 12. The Law on Energy from Renewable Sources No. XI-1375 (adopted by the parliament of the Republic of Lithuania on 12 May 2011). The use of GO's described on the chapter five https://www.e-tar.lt/portal/lt/legalAct/TAR.FC7AB69BE291/erivisPBP Note: added both documents with translation to the English language 2009/72/EC Directive and local legislation: 23. The Law on Electricity of the Republic of Lithuania No. VIII-1881 (adopted by the parliament of the Republic of Lithuania on 20 July 2000). The disclosure system implementation described in the section 8 paragraph 51 subparagraph 6: https://www.e-tar.lt/portal/lt/legalAct/TAR.F57794B7899F/IQUKIToXtd Note: no translation to the English language, the document picks out the essential facts specified on Art. 3 (9) of the IEM Directive 2009/72/EC	Please name the relevant regulations and provide an internet reference (preferably a version in English)
	- When did the regulation(s) regarding disclosure come into force?	1. 2017/01/01; 2. 2011/05/12; 3. The disclosure system implementation is described in paragraph 6 of the Article 51 and came into force in 2017-07-01.	Please name the date in which the regulation(s) came into force.
	- Competent Body (who is and since when?)	Since 2005 AB Lietuvos energija was the Competent Body of guarante of origin, all rights and obligations was transferred LITGRID AB on 2010 (legislation amendments made in 14/11/2016, https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8) In accordance to EU Directives and Lithuania legislation, LITGRID AB issues GOs for the purpose of disclosure of electricity and final consumer's transparency. The supplier provides detailed information if the final consumer's needs it.	Please specify and provide reference to legal nomination and the date since when the body was appointed
	RE-GO system implemented	YES	NO : no secondary legislation and no system in place Almost inline : secondary legislation in place but no registry YES : Secondary legislation in place + registry
	- Legislation	2009/28/EC Directive and local legislation: 1.The rules/regulation of GO procedures approved by Order No.1-298 (adopted by the Minister of Energy of the Republic of Lithuania dated on 14 November 2016). These rules explain how the GO procedure operates in Lithuania. https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8 ; 2. The Law on Energy from Renewable Sources No. XI-1375 (adopted by the parliament of the Republic of Lithuania on 12 May 2011). The use of GO's described on the chapter five https://www.e-tar.lt/portal/lt/legalAct/TAR.FC7AB69BE291/erivisPBP Note: added both documents with translation to the English language	Please name the relevant regulations and provide an internet reference

	- <i>Competent Body (who is and since when?)</i>	Since 2005 AB Lietuvos energija was the Competent Body of guarante of origin, all rights and obligations was transferred LITGRID AB on 2010 (legislation amendments made in 14/11/2016, https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8)	<i>Please specify and provide reference to legal nomination and the date since when the body was appointed</i>
	- <i>Is the appointed Competent Body the only competent body in your domain for Gos (Who and When)?</i>	Yes, since 2005 AB Lietuvos energija was the Competent Body of guarante of origin, all rights and obligations was transferred LITGRID AB on 2010 (legislation amendments made in 14/11/2016, https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8)	<i>Please specify</i>
	CHP-GO system implemented	YES	NO : no secondary legislation and no system in place Almost inline : secondary legislation in place but no registry YES : Secondary legislation in place + registry
	- <i>Legislation</i>	1.The rules/regulation of GO procedures approved by Order No.1-298 (adopted by the Minister of Energy of the Republic of Lithuania dated on 14 November 2016). These rules explain how the GO procedure operates in Lithuania. https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8 ; 2. The Law on Energy from Renewable Sources No. XI-1375 (adopted by the parliament of the Republic of Lithuania on 12 May 2011). The use of GO's described on the chapter five https://www.e-tar.lt/portal/lt/legalAct/TAR.FC7AB69BE291/erivlsPBP Note: added both documents with translation to the English language	<i>Please name the relevant regulations and provide and internet reference</i>
	- <i>Competent Body (who is and since when?)</i>	Since 2005 AB Lietuvos energija was the Competent Body of guarante of origin, all rights and obligations was transferred LITGRID AB on 2010 (legislation amendments made in 14/11/2016, https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8)	<i>Please specify and provide reference to legal nomination and the date since when the body was appointed</i>
	- <i>Is the appointed Competent Body the only competent body in your domain for Gos (Who and When)?</i>	Yes, since 2005 AB Lietuvos energija was the Competent Body of guarante of origin, all rights and obligations was transferred LITGRID AB on 2010 (legislation amendments made in 14/11/2016, https://www.e-tar.lt/portal/lt/legalAct/cd1412c0ab3511e6a6f98c1425a5ffa8)	<i>Please specify and provide reference to legal nomination and the date since when the body was appointed</i>
ID	Implementation of the elements of the Directive Related to GOs		
Definition			
	The sole function of a GO is the usage for disclosure purposes for final customers.	YES	YES: in the Domain GO is defined as such (electronic energy certificate that meets the requirement of the RES Directive for RE-GO) NO: in the Domain GO is not defined as such NA: No RE-GO system in place
Implementation of Article 15 of the Directive			
	<i>Have you fully implemented the requirements of Art. 15 of the RES-Directive?</i>	YES	
	<i>If not, please specify the ones which you have not implemented yet.</i>	-	
ID	RE-DISS BPR		
12th Month Rule			
	Metered production periods for issuing GOs are not longer than a calendar month.	YES	NO : metered periods for issuing GOs are longer than a calendar year YES : If true Nota Bene : in case only RES GOs implemented only assess RES-GO system

	Metered production periods for issuing GOs do not run across the start and end of disclosure periods. Longer intervals up to one year are acceptable for very small plants, for example.	NO, metered periods for issuing GO run across the start and end of disclosure periods.	NO : Metered periods for issuing GO run across the start and end of disclosure periods. YES : If true Nota Bene : in case only RES GOs implemented only assess RES-GO system
	If possible, issuing of GOs is done DIRECTLY after the end of each production period (potential exemption PV)	YES, within 1 months after the production period	NO : more than 6 months after the end of the production period Almost in line : between 3 and 6 months after the PP YES : within 3 months after the production period
	Lifetime of GO is limited to 12 months after the end of the production period.	YES	NO : is not true YES : is true Nota Bene: in case only RES GOs implemented only assess RES-GO system <i>In the description section, please identify if this is true for other GO systems in place as well</i>
	GOs that have reached this lifetime (and haven't been used for disclosure) are collected into the Residual Mix	NO	NO : is not true YES : is true Nota Bene: in case only RES GOs implemented only assess RES-GO system <i>In the description section, please identify if this is true for other GO systems in place as well</i>
	Cancellations of GO relating to production periods in a given year X which take place until a given deadline in year X+1 count for disclosure in year X. Later cancellations count for disclosure in year X+1. (In case that disclosure periods differ from the calendar year, the deadline is defined accordingly.)	NA	Answer is YES or NO Nota Bene : in case only RES GO is implemented only assess RES-GO system <i>Please provide details of the system in place in the Domain.</i>
	Deadline is set on 31 March X+1	NA	YES: Deadline is the stated one NO: Different Deadline <i>If other, Please state the deadline in the description column.</i>
	The same allocation rule applies for expired GO: The date of expiry thus determines the disclosure period for which information from expired GO will be used.	NA	Answer is YES or NO" Nota Bene : in case only RES GOs implemented only assess RES-GO system
Usage of EECS			
	The implementation of GO in all countries in Europe is based on the European Energy Certificate System (EECS) operated by the Association of Issuing Bodies (AIB). In case that national GO systems are established outside the EECS, then EECS is at least used for transfers between registries.	YES	NO : transfers of GOs between registries are not done through EECS YES : transfers of GOs between registries are done through EECS
	Is the GO system in the country established exclusively according to EECS?	YES	YES: If true Almost in Line: both national GO and EECS system NO: if not true
	Does the domain utilise the AIB Hub for international transfers?	YES, as soon as it is connected	Yes: If true Almost in Line: also use other systems for transfer of GO besides the AIB Hub No: if not true

	<p>In case that not all European countries are members of EECS, appropriate connections between the EECS system and non-EECS members as well as between different non-EECS members are to be established. These include inter alia procedures for assessing the reliability and accuracy of the GO issued in a certain country and interfaces for the electronic transfer of GO.</p>	<p>YES</p>	<p>NO : no procedure to assess reliability and accuracy of GO YES : procedures in place to assess reliability and accuracy of GO</p>
	<p>Ex-domain cancellations of GO, where a GO is cancelled in one registry and a proof of cancellation is then transferred to another country in order to be used there for disclosure purposes, are only used if there is no possibility for a secure electronic transfer and if there is an agreement on such ex-domain cancellations between the competent bodies involved. Statistical information on all ex-domain cancellations are to be made available in order to support Residual Mix calculations.</p>	<p>YES</p>	<p>NO : none of the two statements are true Almost in line : one of the statements is true YES : Both statements are true Nota Bene : in case only RES GOs implemented only assess RES-GO system</p>
<p>Issuing of GOs for different energy sources and generation technologies</p>			
	<p>GOs are issued only for the net generation of a power plant, i.e. gross generation minus the consumption of all auxiliaries related to the process of power production. For hydro power plants involving pumped storage this means that GOs are issued only for the net generation which can be attributed to natural inflow into the reservoir.</p>	<p>YES</p>	<p>NO : If not true YES : If true</p>
	<p>Verification mechanisms are implemented for ongoing control of registered data (e.g. reaudits, random checks, etc.).</p>	<p>YES</p>	<p>NO : If not true YES : If true</p>
	<p>Correct accounting of RES share of combustion plants is assured by adequate measures (EECS Rules)</p>	<p>YES</p>	<p>NO : If not true YES : If true</p>
	<p>The competent body can correct errors in GOs it has issued before they are exported, and is the only one with this competence.</p>	<p>YES</p>	<p>NO : If not true YES : If true</p>
	<p>The GO system is extended beyond RES & cogeneration to all types of electricity generation.</p>	<p>YES, but in this case we applied just for RES GO</p>	<p>NO : no extension YES : extension in place</p>
	<p>GOs are issued for all electricity production, unless an RTS (Reliable Tracking Systems) applies for that production, e.g. for the disclosure of supported electricity</p>	<p>YES, but the GO considered as cancelled if Lithuanian producers have received the support as mentioned in the Domain Protocol paragraphs C.3.1.1-C.3.1.6 and in accordance with the Directive 2009/28/EC. The foreign guarantees of origin do not apply to this rule.</p>	<p>NO : If not true YES : If true</p>

The Competent body has made the use of GOs mandatory for all electricity supplied to final consumers (full disclosure implemented).	NO	NO : If not true YES : If true
All types of GO are handled in one comprehensive registry system per country. (For an exception see the coexistence of national GO systems and EECS)	YES	Almost in line: if more than one registry, but closely coordinated YES: one comprehensive registry NO: Different registries
Technical changes to plants are registered as soon as is reasonably practicable.	YES	NO : If not true YES : If true
GOs have no function in terms of target compliance and should not be used as support instrument. All GOs are linked to disclosure.	YES, but the GO considered as cancelled if Lithuanian producers have received the support as mentioned in the Domain Protocol paragraphs C.3.1.1-C.3.1.6 and in accordance with the Directive 2009/28/EC. The foreign guarantees of origin do not apply to this rule.	YES : all GOs are linked to disclosure Almost in line : if at least RES GO system is linked with disclosure, but others not clearly NO : no GO system is linked to disclosure
A GO is considered as being used only once it has been electronically cancelled.	YES	NO : If not true YES : If true
After cancellation, no further cancellation, transfer or export of the given GO is possible	YES	NO : If not true YES : If true
After expiry, no further cancellation, transfer or export of the given GO is possible	YES	NO : If not true YES : If true
An exported GO is marked as removed from the exporting registry	YES	NO : If not true YES : If true
Processes in the registry excludes duplication of GOs.	YES	NO : If not true YES : If true
Registries are audited on a regular basis.	YES	NO : If not true YES : If true
If multiple certificates are to be issued, e.g. a GO for disclosure and a support certificate for management of a support system, then these are legally separated.	YES	NO : not legally separated YES : legally separated NA: no multiple certificates
This GO combines the functionalities of a RES-GO and a high efficiency cogeneration GO.	NO, just RES-GO, regarding a high efficiency cogeneration possibly in future	NO : the GO does not combine both informations (lost of one information). YES : the GO combines both RES and CHP in one GO
<i>GO as the unique "tracking certificate"</i>		
GO is the only "tracking certificate" used. Any other tracking systems of a similar purpose and function as GO are closely coordinated with GO and eventually converted to GO.	YES	YES : GO is the only tracking certificate Almost in line : coordination between GO and other certificate NO : no coordination between the 2 systems
Besides GO, only Reliable Tracking Systems (which may include contract based tracking) and the Residual Mix is available for usage for disclosure. No other tracking mechanisms are accepted.	Only GO	YES : GO + RM or GO + RM + RTS NO : GO + other tracking system which is not a RTS + (RM)
Green power quality labels use GO as the unique tracking mechanism.	NA	either YES or NO or NA if no green power label

	<u>Recognition of GO imported from other countries</u>		
	<p>European countries choose one of the two following options and apply it consistently for all foreign GO :</p> <ul style="list-style-type: none"> - Rejection of GOs only relates to the cancellation of GOs and subsequent use for disclosure purposes in the respective country and does not restrict the transfers of GOs between the registry of the considered country and the registries of their countries. This means that the decision about the recognition of a GO does not hinder its import into the considered country. - Rejection of GOs implies blocking their import to the national registry. 	<p>YES, in accordance with Lithuanian law LITGRID AB can recognize the GO issued in European Union Member States and the European Economic Area.</p>	<p>YES : If one of the options is applied NO : If none of the options is applied NA : no rejection of GO foreseen in the legislation</p>
	<p>The choice of one or the other option is transparent for all market parties and clearly communicated.</p>	<p>YES</p>	<p>YES : If true NO : If not true NA : no rejection of GO foreseen in the legislation</p>
	<p>Within the rules set by the respective Directives, European countries consider their criteria for the acceptance of imported GOs for purposes of disclosure.</p>	<p>YES</p>	<p>NO : no rejection criteria YES : Rejection criteria have been listed Almost in line : Rejection criteria being discussed</p>
	<p>These criteria address imports at least from all EU member states, other members of the European Economic Area (EEA) and Switzerland. The parties to the Energy Community Treaty are considered as well, as soon as GO imports from these countries become relevant.</p>	<p>YES, all EU member states, other members of the European Economic Area (EEA), except Switzerland</p>	<p>NO :criteria do not address imports of GO YES :criteria address imports of GO</p>
	<p>The criteria specify the electronic interfaces, data format and contents of GOs to be imported, which the respective country accepts for imports of GOs (such as the EECS Hub).</p>	<p>YES</p>	<p>NO : criteria do not specify electronic interface, data format and contents of GO to be imported YES :criteria do specify electronic interface, data format and contents of GO to be imported</p>
	<p>Conditions for the recognition of GOs from other countries are that they were issued based on Art. 15 of Directive 2009/28/EC or compatible national legislation, and that they meet the explicit requirements set in Art. 15, for example, regarding the information content of the GOs.</p>	<p>YES</p>	<p>NO : If not true YES : If true</p>
	<p>The recognition of GOs from other countries is rejected if these countries have not implemented an electricity disclosure system.</p>	<p>YES</p>	<p>NO : If not true YES : If true</p>

	<p>The recognition of GOs from other countries is rejected if the country which has issued the GOs or the country which is exporting the GOs have not implemented appropriate measures which effectively avoid double counting of the attributes represented by the GOs. Such appropriate measures ensure the exclusivity of the GOs for representing the attributes of the underlying electricity generation, implement clear rules for disclosure, establish a proper Residual Mix or equivalent measures, and ensure their actual use.</p> <p>Furthermore, the appropriate measures ensure that attributes of exported GOs are subtracted from the Residual Mix of the exporting country and cannot be used for disclosure at any time in the issuing or the exporting country by explicit mechanisms, unless the GOs are re-imported and cancelled there.</p>	YES	<p>NO : If not true YES : If true Almost in line: if part of the measures are implemented</p>
Disclosure Schemes and other Reliable Tracking Systems			
	<p>Full disclosure schemes are implemented, including the disclosure of CO₂ emissions and radioactive waste.</p>	YES	<p>YES or NO or Almost in line if only CO₂ or Nuclear waste or other restriction (e.g. only provided on website and not with bills and information material) <i>In the description column please specify:</i> - If the answer is almost in line, please describe the attribute that is missing (or any other restriction). - Please insert the energy sources (fuels) that have to be distinguished. - Also specify if certain attributes are allocated as "unknown" share in the fuel mix?</p>
	<p>RTS (Reliable Tracking Systems) can comprise, where applicable:</p> <ul style="list-style-type: none"> - Homogeneous disclosure mixes for regulated market segments where no choice of supplier or different products exists, - Support systems whose interaction with disclosure requires a certain allocation of the attributes of supported generation (e.g. a pro-rata allocation to all consumers in a country where RES electricity is supported by a feed-in tariff), - Contract based tracking 	NA	<p>NA YES : if true Almost in line NO is not allowed</p>
Calculations of Residual Mixes			

	Where a full-disclosure system has not been implemented in the country, the countries provide a Residual Mix (RM) as a default set of data for disclosure of energy volumes for which no attributes are available based on cancelled GO or based on other Reliable Tracking Systems. The use of uncorrected generation statistics (e.g. on national or UCTE, Nordel etc. levels) are avoided.	NO	YES : proper RM calculation, or fully explicit tracking system applied based on GO and RTS Almost in line : default set of data avoiding double counting of RES attributes; or fully explicit tracking system applies, but not fully based on GO and RTS NO : No RM
	The calculation of the Residual Mix follows the methodology developed in the RE-DISS project and taken over by the AIB.	YES	YES : use of RE-DISS European Residual mix or of RE-DISS national RM NO : no use of RE-DISS mixes
	The Competent body from my country cooperates with AIB in order to adjust the Residual Mix in reflection of cross-border transfers of physical energy, GO and RTS.	YES	YES : if true (including e.g. Data collection of RE-DISS) NO : if not true
	For purposes of this cross-border adjustment, the competent body uses data provided by RE-DISS. The competent body also supports the collection of input data for the related calculations by the AIB (and it's consultant).	NA, it isn't the responsibility of the Issuing Body.	The focus is on the first part of the sentence YES : use of AIB RM data (RE-DISS methodology) Almost in line: use of EAM data (in case of deficit domains) NO : no use of AIB data NA : fully explicit disclosure system (without unknown shares)
	As a default, the Residual Mix is calculated on a national level. However, in case that electricity markets of several countries are closely integrated (e.g. in the Nordic region), a regional approach to the Residual Mix may be taken. This should only be done after an agreement has been concluded amongst all countries in this region which ensures a coordinated usage of the regional Residual Mix.	NA	YES : coordinated regional approach or national approach NO : uncoordinated regional approach or no RM NA
Contract based tracking			
	If contract based tracking (CBT) is allowed in a country, it is regulated clearly and declared in the domain protocol.	NA	YES : true or CBT accepted NO : not true Almost in line : CBT exists and efforts have been made to regulate it NA : CBT not allowed

	<p>Such regulations ensure that</p> <ul style="list-style-type: none"> - The rules of the tracking system are transparent and comprehensive and are clearly understood by all participants in the system. - Double counting of attributes and loss of disclosure information is minimised within the contract based tracking scheme and also in the interaction of the contract based tracking scheme to GO and other RTS (if applicable). As a precondition for this, the contract based tracking scheme is able to provide comprehensive statistics about the volumes and types of electricity attributes which are tracked through it. - The relevant information for disclosure purposes is available in time to meet the timing requirements 	NA	<p>YES : true NO : not true Almost in line : CBT exists and efforts have been made to regulate it NA : when CBT is not allowed</p>
Timing of Disclosure			
	Electricity disclosure is based on calendar years.	YES	<p>YES or NO Almost in line: if calendar year + another period can be chosen (ex. Financial year) <i>In the description column, if other period is used, please identify it: starting date-end date</i></p>
	The deadline for cancelling GO for purposes of disclosure in a given year X is 31 March of year X+1.	NA	<p>Yes: Deadline is the stated one No: Different Deadline <i>If other, Please state the deadline in the description column.</i></p>
Further Recommendations on Disclosure			
	The relation between support schemes for RES & cogeneration on the one side and GO and disclosure schemes on the other side are clarified. Where necessary, the support schemes should be defined as RTS	YES	<p>YES : clear allocation of supported attributes NO : no clear allocation of supported attributes Almost in line : not allowed NA : No legislation <i>In the description column please describe how supported energy is allocated to consumers in terms of disclosure.</i></p>
	If support schemes are using transferable certificates, then these certificates are separated from GO	Yes, but the supported certificate (the support granted from the government) automatically considered as canceled in Lithuania.	<p>NO : not legally separated YES : legally separated NA: no multiple certificates</p>
	All electricity products offered by suppliers with claims regarding the origin of the energy (e.g. green or low-carbon power) are based exclusively on cancelled GO. No other tracking systems are allowed, with the exception of mechanisms defined by law, e.g. a pro-rata allocation of generation attributes to all consumers which is related to a support scheme.	YES	<p>YES : only GOs accepted for green products NO : other TS accepted for green products NA : no green products on the market Almost in line : not allowed</p>

	As required by Art. 3 (9) of the IEM Directive 2009/72/EC annual disclosure of the supplier mix on or with the bill is mandatory. This also includes information on environmental impacts.	NO	NO :annual disclosure of supplier mix is not mandatory on or with the energy bill and it does not include information on environmental parameters. YES :annual disclosure of supplier mix is mandatory on or with the energy bill and it does include information on environmental parameters Almost in line: annual disclosure of supplier mix is mandatory on or with the energy bill but it does not include information on environmental parameters NA : no disclosure system in place
	Suppliers offering two or more products which are differentiated regarding the origin of the energy are required to give product-related disclosure information to all their customers, including those which are buying the “default” remaining product of the supplier.	NO	YES or NO NA : no green products on the market Almost in line : only product mix is disclosed, but not the (mandatory) supplier mix
	There are clear rules for the claims which suppliers of e.g. green power can make towards their consumers. There are rules on how the “additionality” of such products can be measured (the effect which the product has on actually reducing the environmental impact of power generation), and suppliers are required to provide to consumers the rating of each product based on these rules.	NO	YES : clear rules on green products NO : no clear rules NA : no green products on the market Almost in line : not allowed
	Claims made by suppliers and consumers of green or other low-carbon energy relating to carbon emissions or carbon reductions are regulated clearly. These regulations avoid double counting of low-carbon energy in such claims. A decision is taken whether such claims should adequately reflect whether the energy purchased was “additional” or not.	NO	YES : clear rules on green products NO : no clear rules NA : no green products on the market Almost in line : not allowed
	In case that suppliers are serving final consumers in several countries rules are developed and implemented consistently in the countries involved on whether the company disclosure mix of these suppliers relates to all consumers or only to those in a single country.	NK	For most countries Not Known (NK) applies if information cannot be found YES : clear rules on level of disclosure NO : known practices of international disclosure by suppliers Almost in line : some progress has been made NA : not allowed
	The following recommendations are followed with respect to the relation of disclosure to cooperation mechanisms (Art 6 - 11 of Directive 2009/28/EC):		
	a) If EU MS or MS or any other country agree on Joint Projects, such agreements also clarify the allocation of attributes (via GO, RTS or Residual Mix) issued from the respective power plants	NA	YES: If agreements for Joint Projects clarify the allocation of attributes NO: If the proposal is not true NA: No joint projects

b) If EU MS agree on Joint Support Schemes, such agreements clarify the allocation of attributes (via GO, RTS or Residual Mix) issued from the power plants supported under these schemes	NA	YES: If agreements for Joint Support Schemes clarify the allocation of attributes NO: If the proposal is not true NA: No joint projects
---	----	---

Information on the Recognition of GO

Extra questions on recognition of GO		Instructions for assessment/explanations
Does the Domain treat imported GO as national GO when it comes to disclosure? If so, please specify.	YES	NO: It treats imported GO differently from national issued GO in disclosure (for example: has criteria for accepting imported GO). YES: treats them equally "Almost in line" is not possible
Does the Domain have criteria in place for accepting foreign GO for disclosure?	NO, as the same as specified in Art. 15 (6) RES Directive	YES : criteria in place NO : no criteria in place "Almost in line" is not possible NA : no rejection of GO foreseen in the legislation
- If yes, please specify the criteria which are in place	-	Please state which criteria of Art. 15 (6) RES Directive are implemented: Electronic database in place One competent body appointed by law all GOs linked to disclosure CO ₂ emissions and radioactive waste included in disclosure display transparent publication of disclosure information others, please specify
Since when do you have these criteria in place?	-	Please specify
Are the criteria transparently published in your country?	-	Please specify and indicate where those are published. If electronically please provide a link.

Information on Environmental Parameters

What are the data basis for disclosing CO ₂ emissions and radioactive waste when using GOs or other Reliable Tracking Systems for disclosing specific supplier mixes?	NO disclosure	Please describe how it is done in the Domain
--	---------------	--

Information on Disclosure aspects

Extra questions regarding the provision of disclosure information on a disclosure statement towards end consumers		Instructions for assessment/explanations
---	--	--

<p>Are there any regulations on graphical display of disclosure information by suppliers (requirements on how to display, fixed format of disclosure statement, ...)</p>	<p>NO</p>	<p><i>Pls. Provide short explanation plus reference to website/regulation.</i></p>
<p>Is there a requirement to provide comparison values besides supplier- and product mix? If so, which one (e.g. national production mix)</p>	<p>NO</p>	<p><i>Pls. Provide short explanation plus reference to website/regulation.</i></p>
<p>Is disclosure information somehow controlled by an official or independent institution? By whom? If so, is it audited or approved or calculated by that body?</p>	<p>C.2.1.5. Procedure for publicly disclosed information, approved by the National Commission for Energy Control and Prices (Article 22) (link to the document - https://www.e-tar.lt/portal/lt/legalAct/2c79837072cd11e3a017ebc0cf91d114/HTerBMwNjg) states that the retail supplier on a regular basis publishes and updates the information on contribution of each energy source to the overall fuel mix, including renewable energy, supplied by the supplier during preceding year, provided that such information is available. The Commission conducts regular monitoring of the information published by</p>	<p><i>Pls. Provide short explanation plus reference to website/regulation.</i></p>
<p>Is disclosure information of different suppliers centrally available (e.g. at the Competent Body, on a central website)?</p>	<p>NO</p>	<p><i>Pls. Provide short explanation plus reference to website/regulation.</i></p>
<p>Is there an official regulation on communication of aspects related to additionality or ecological quality aspects together with disclosure? Please describe.</p>	<p>NO</p>	<p><i>Pls. Provide short explanation plus reference to website/regulation.</i></p>
<p>Is there a specific regulation on disclosure of (high-efficient) CHP in your domain?</p>	<p>YES, the rules for the issuing of guarantees of origin for electricity produced from high-efficiency cogeneration - https://e-seimas.lrs.lt/portal/legalAct/lt/TAD/TAIS.437388 (only in Lithuanian language). LITGRID AB is the issuing body, a GO is issued upon request of producer. It is prohibited to take into account and use more than once the unit of energy produced by the same high-efficiency cogeneration unit. Reports about issued, transferred and withdrawn GO are published on Litgrid's website http://www.litgrid.eu/index.php/paslaugos/kilmes-garantiju-suteikimas/ataskaitos-ania-kilmes-pazymejimus/563</p>	<p><i>Pls. Provide short explanation plus reference to website/regulation.</i></p>
